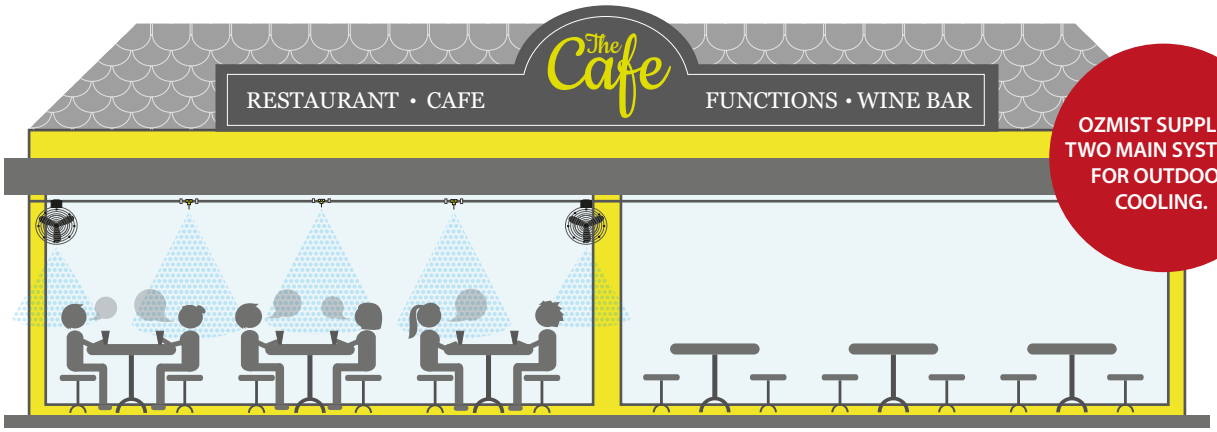
ALFRESCO COOLING

5 BIGGEST PROBLEMS YOUR BUSINESS FACES IN +30° HEAT

- ✓ **Too hot for customers to sit outdoors**
- ✓ **Hot customers won't stay long**
- ✓ **Flies, bugs and other flying insects**
- ✓ **Empty tables don't earn money**
- ✓ **Staff working in hot conditions**

OZmist are the experts in outdoor cooling and over the past 17 years have provided systems to some of Australia's most prestigious venues. The OZmist system produces an ultra-fine mist that "flash evaporates" and lowers the surrounding temperature by up to 10° instantly, making the outdoor experience much more comfortable for patrons and staff. The best thing is the mist will be totally evaporated above head height and will not wet any tables, floors or surfaces.

Call the friendly team at OZmist who will design & supply an outdoor cooling system that will make your business the coolest around.



OZMIST SUPPLIES TWO MAIN SYSTEMS FOR OUTDOOR COOLING.

With an OZmist Misting System (Static Line & Fan Based Combo Shown) **Without an** OZmist Misting System

STATIC LINE SYSTEM

The most popular in Alfresco areas is the Static Mist Line System where lengths of stainless steel tube and nozzles are run under covered areas or around the perimeter to create a curtain of cool refreshing mist.

or

MISTING FANS SYSTEM

Mist Fans are also very popular and are ideal for larger undercover and open areas. Misting fans throw cool refreshing mist up to 10 meters also keeping flies and bugs away.

or

STATIC LINE & MISTING FAN COMBINATION

Cannot decide or do you like the look of both systems? Great news, you can combine both to suit your business needs. Both are cheap to run, easy to install and customisable.

Both systems use a pump to pressurise tap water to 1,000PSI.
Systems can be supplied in kit form and are quickly and easily installed.
