

DOMESTIC COOLING

THE HOTTER IT IS THE BETTER IT WORKS!

OZmist are the experts in outdoor cooling and over the past 17 years have provided systems to some of Australia's most prestigious venues.

You can now bring professional quality and superior cooling to your own home, with the Italian made SIMMM D13 High-Pressure Pump Module.

Choose from either Fan Based or Static Tube systems, the small D13 gives you the option to run either while producing incredibly fine mist particles that will cool your area without wetting furniture or surfaces.

The D13 can supply a total of 13 Individual Misting Nozzles, this means you can choose from either 10m of Static Stainless Tubing or up to 2 x Misting Fans. Whichever way you decide to go you will feel the difference our Mist Cooling systems will reduce the outdoor temperature by 10°C and will help to keep and unwanted flies and bugs away.

Our systems are designed to be easily accessible for every handy person, requiring no specialty tooling for the Installation. Every one of our systems is supplied with a step by step installation manual.

NO WET GUARANTEE

OZmist high pressure mist systems are designed to be installed so as not to wet floors or surfaces. Don't be confused, cheap tap connected systems will wet.

OVER 17 YEARS EXPERIENCE

OZmist is an Australian owned and operated business. Large or small, we have worked with many of Australia's premium companies to deliver outstanding results.

Our KTW2460 & KTW1845 Misting Fans are designed for use in outdoor and indoor areas. Key features of our KTW Fan range are:

- Corrosion Treated Body then Powder Coated Gloss Black.
- Rated IPX4 for outdoor use.
- Four large aluminium fan blades for maximum air flow while remaining quite.
- KTW Fans feature 3 fan speeds, oscillation and tilt.
- A 6 x nozzle stainless steel misting ring is pre-installed to these KTW Fans.
- Up to two KTW Fans can be run from a single SIMMM D13 pump module.
- Simple installation of these fans makes them a perfect addition to any home.

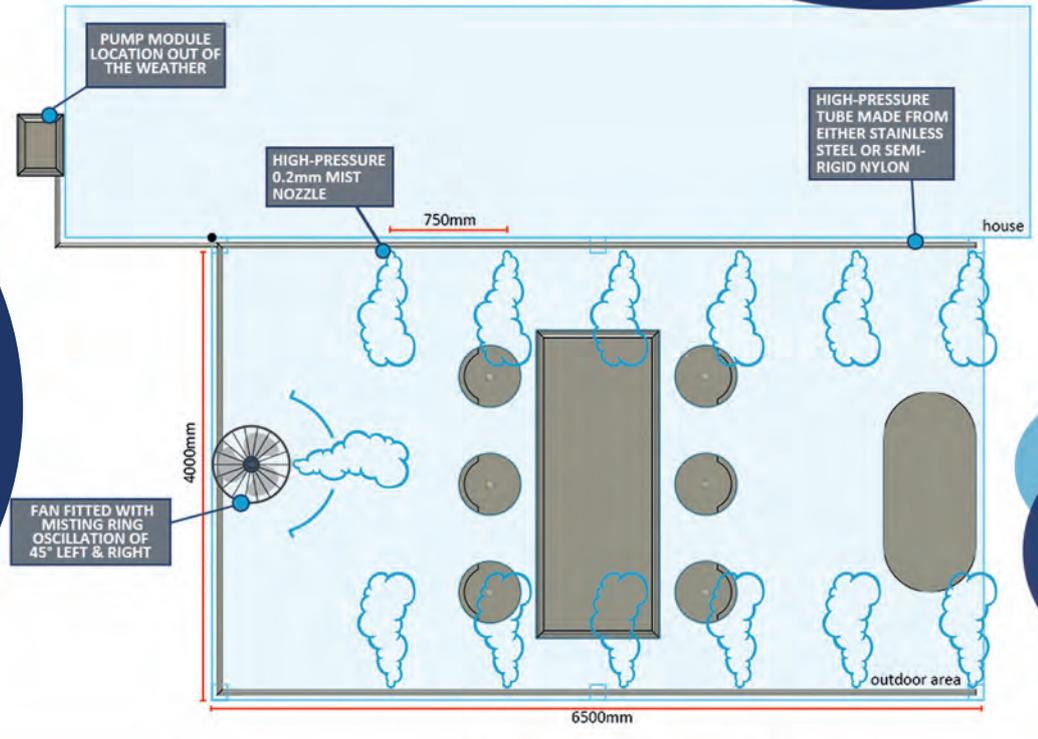

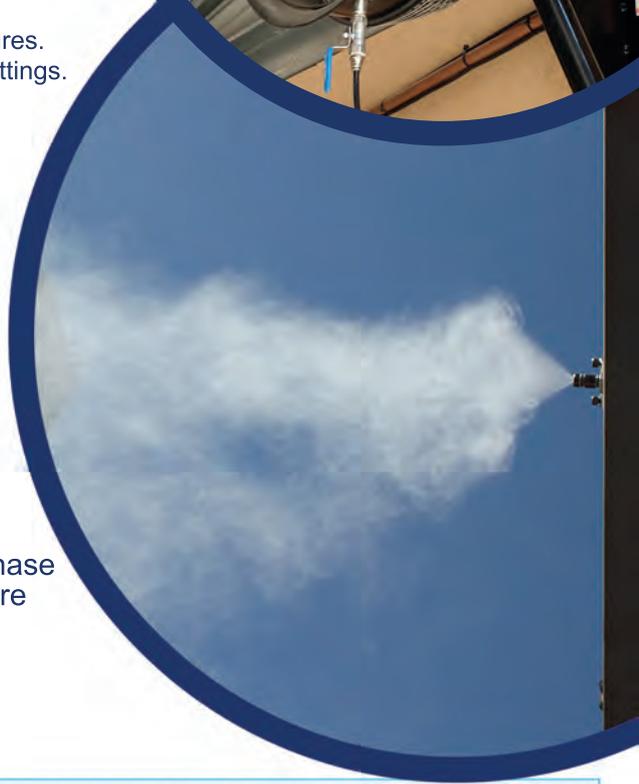

Our Static Mist Line Systems are perfect for your alfresco and outdoor areas. Make full use of your outdoor area this summer with these standout features:

- Can be installed to fascias, verandas, permanent umbrellas or other fixed structures.
- Tubing is constructed from 304 grade stainless steel, with chrome plated brass fittings.
- Steel is supplied in 750mm lengths so no cutting is required.
- Lengths are easily joined with fittings from our quick fit range.
- Anchoring Saddles / Clips are included with the Misting system.
- Simple installation designed to be an easy project for anyone who loves DIY.

The SIMMM D13 pump module pressurises water to 1,000 PSI which creates an incredibly fine droplet that 'Flash Evaporates', absorbing the heat in the air without any wetting of floors or surfaces.

Our SIMMM D13 High-Pressure Domestic Pump Module will support a total of 13 x 0.2mm Nozzles at 1000psi or 70bar.

You will find all of our High-Pressure Domestic Kits available for purchase on our online store at www.ozmist.com.au. If you cant find what you are looking for feel free to contact us on 1300 306 478.
