

PORTAMIST MK2 PORTABLE MISTING FAN

The **Portamist MK2** Misting Fan is the ultimate high pressure mist fan for both indoor and outdoor areas. Industrial quality, versatile and stylish good looks make the **PortaMist MK2** perfect for the factory, workshop, backyard, animal cooling, sporting events or the hire industry.

The high pressure pump in the **PortaMist MK2** pressurises the on board water to 1,000PSI and forces it through nozzles on the face of the fan. This generates millions of tiny water droplets that "Flash Evaporate" and absorb the heat in the air without wetting of floors or surfaces.

The powerful fan circulates cooled air over 8 meters.

**The Hotter
it is the
Better
it Works!**

FEATURES

- ✓ In built triplex piston pump that pressurises water to 1,000PSI
- ✓ On board water tank holds 70 litres or 4 hours run time
- ✓ Will run continuously when connected to a water supply
- ✓ 3 speed 600mm diameter, 4 blade cooling fan
- ✓ 6 nozzle, stainless steel misting ring fitted to fan guard
- ✓ 4 mist run cycles with easy to use touch pad
- ✓ Water filter inside tank to ensure clean water and trouble free operation
- ✓ Ultra-fine mist droplets 'Flash Evaporate' without wetting floors or surfaces
- ✓ Large pneumatic tyres for wheeling over rough ground
- ✓ Tough ROTA molded plastic tank with extra strong steel frame

SAFETY

- ✓ Built in low pressure switch shuts pump down when water level is low
- ✓ Internal Float Valve controls water entering the tank
- ✓ TEFC totally enclosed fan motor with an IPX4 water proof rating.
The only one of it's type in Australia and exclusive to OZmist!
- ✓ TEFC pump motor - enclosed motor reduces the chance of electric shock
- ✓ Crane lifting point on trolley

PORTAMIST MK2 SPECIFICATIONS

The OZmist **PortaMist MK2** portable misting unit is a star performer. It provides fast and efficient cooling with the added advantage of it's own on board water tank. Simply fill the tank or leave connected to a garden hose and plug into a 10amp power supply. A full tank of water will provide cool refreshing mist for around 4 hours.

**FILL,

& GO**

4 Hrs RUN TIME!

4 MIST PROGRAMS AT THE TOUCH OF A BUTTON

- I. CONTINUAL OPERATION
- II. 30 SECONDS ON / 30 SECONDS OFF
- III. 40 SECONDS ON / 40 SECONDS OFF
- IV. 50 SECONDS ON / 50 SECONDS OFF

Works in any weather! No need to move it indoors when it rains!

OVERALL HEIGHT:
2,000mm Fully Extended

TANK CAPACITY:
70 litres

POWER SUPPLY:
240 volt, 50 Hz, .4KW
combined power usage

PUMP:
Power 0.25KW
RPM 1350
Triplex Piston
Oil 10W40 Fully Synthetic
Operates at 1,000PSI

FAN:
3 Speed, Variable
Oscillating Function
Oscillating On/Off control

SPEED MAX
RPM 1450, Power 150Watts,
0.72AMPS
Motor water resistant IP54
