

# PATIO MIST

## PORTABLE AND WALL MISTING FANS

There's nothing better than entertaining friends and family on a hot summer's day. But what happens when the temperature soars? There's no need to swelter this summer.

## The Solution? .....The OZmist PatioMist!

PatioMist fans are the latest innovation in misting system technology and create a very fine mist which quickly evaporates and provides fast and efficient cooling with no wetting of floors or surfaces.

### FEATURES

- ✓ Wall and Pedestal fans available in 650mm diameter.
- ✓ Both fans are three speed and oscillate from side to side.
- ✓ Wall fans have two pull cords attached to the water tank under the fan head. One cord alters the fan speed while the other turns the mist on and off.
- ✓ The pedestal unit has a 70 litre water tank fitted which is enough water for two days operation.
- ✓ The wall mounted version requires a constant water connection via the included hose.
- ✓ Both variants of the 650mm PatioMist unit (wall mounted and portable) will throw cool refreshing air over 9 meters!
- ✓ Water droplets too large to be effectively evaporated are taken back to the tank for re-use.

SUMMER  
MUST HAVE

12 MONTH  
WARRANTY!  
ON BOTH UNITS

ADJUSTABLE MIST CONTROL
