

HELIOSA WIDE ANGLE

Heliosa® Wide Angle

Remote Power Controller

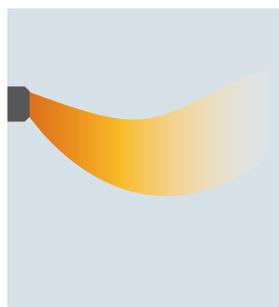

Instant Comfort Where it's Needed

Short wave infrared halogen radiance is the most effective means of delivering immediate heat and comfort.

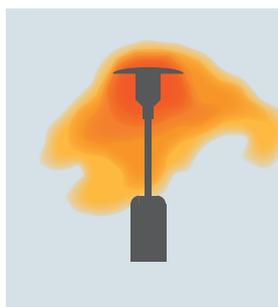

In excess of 92% of the energy used is transformed into heat, at least 30% more than medium wave quartz infrared heaters and 60% more than long wave (far) infrared resistance heaters. This is because short wave infrared directly heats people and objects. Just like the sun coming out from behind a cloud on a cold day, you feel instantly warm - the heat stays put and does not rise to the ceiling or escape through windows and doors. Heliosa® offers Italian styling ideal for heating large outdoor or alfresco spaces providing significant energy cost savings while keeping people warm, even in the hardest to heat environments.

Heliosa® Wide Angle Key Features

- 80% reduction to light output compared to traditional infrared lamps. Warm gold halogen for ambience of an open fire.
- Patented parabolic reflector maximises heated area - watt for watt, the widest and longest heating footprint available.
- InFraCaLoR® halogen lamps have up to 7000 hours of life combined with 'soft start' technology to lower maintenance costs.
- Rated for outdoor use and can operate safely in the wet.
- Provides zone heating as energy efficiently as possible.
- Remote power controller offers 50%, 75% and 100% instant heat - full heat in 5 seconds of switching on.

What you get with Heliosa® Wide Angle

- Instant comfort + no heat up time = energy savings.
- Warm gold glow reduces glare and improves ambience.
- Patented parabolic reflectors offers area comfort coverage up to 17.5m².
- Variety of mounting options - wall, ceiling, stands.
- Water resistant IPx5 allows for exposed outdoor installation.
- Can be controlled by individual switch or timer.
- Remote power controller allows three settings and zoning of multiple heaters (up to twelve per remote)*.
- Light and durable aluminium structure, reflector and long life lamp make for easy installation and low maintenance.
- Models available in Carrara White and Optic Black.
- Designed and manufactured in Italy to conform to International and Australian Standards (CE Mark and AS/NZ RCM).

* Power controller does not switch heater 'on' and 'off'.

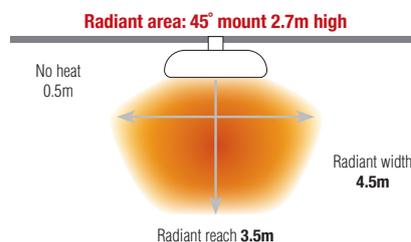

Carrara White

Optic Black

| All specifications may change without notice. | | Heliosa Wide Angle |
|-----------------------------------------------|--|------------------------------|
| Watts | | 2000W |
| Amps @ 240 VAC | | 8.33 |
| Radiant efficiency | | 92%+ |
| Dimensions | | 52 x 12 x 21cm |
| Net Weight | | 2.8kg |
| Min. Clearance to Floor | | 2.4 - 2.7m |
| Clearance to Ceiling / Cover | | 0.25m |
| Min. Side Clearance | | 1.0m |
| Mounting Options | | Wall, Ceiling, Stand |
| Front Cover / Lamp | | Stainless Steel Grill / Gold |
| Cable Supplied | | 2.4m 3 core lead |
